**Re: Approval to Install Underground Sanitary Drain Piping**

Dear Mr. Thompson:

I grant your June 6, 2024 request for Port Arthur LNG, LLC (PALNG) to commence construction activities of the underground sanitary drain piping. Your request is consistent with Conditions 37, 39, 43, and 45 of the Commission's April 18, 2019 *Order Granting Authorizations Under Section 3 and 7 of the Natural Gas Act* (Order) in the above-referenced docket. This approval is based on FERC staff review of the information filed on June 6, 2024. Please note that this approval is limited to the segments of the underground sanitary drain piping system described in your June 6, 2024 filing and does not grant PALNG the approval to install other underground or aboveground piping associated with PALNG's sanitary drain system.

I remind you that PALNG must comply with all applicable remaining terms and conditions of the above referenced Order, as well as procedures stipulated in your previous filings. We also note that PALNG must comply with any applicable Department of Transportation requirements under 49 CFR 193 subject to Department of Transportation Pipeline and Hazardous Materials Safety Administration enforcement. Similarly, PALNG must comply with any applicable U.S. Coast Guard requirements under 33 CFR 127 and 33 CFR 105 subject to U.S. Coast Guard enforcement.

Please note that this approval does not grant PALNG the authority to commence construction other project facilities at the LNG terminal. Additional authorizations will be released once PALNG has demonstrated full compliance with the conditions of the Order. Furthermore, we note that FERC staff look to continuously evaluate the safety

and reliability of LNG facilities through its technical reviews and inspections, which may result in recommendations.

If you have any questions regarding this approval, please contact Emily Empert at (713) 651-4605.

Sincerely,

Jonathan Turquette  
Chief, LNG Branch 3
