# Appendix B

## **TCEQ Electronic Modeling Evaluation Workbook**

**Texas Commission on Environmental Quality**  
**Electronic Modeling Evaluation Workbook (EMEW)**  
**General**

Date: 8-1-2025

Permit #: TBD

Company Name: Fermi Equipment Holdco LLC

TCEQ 20835, Version 3.0

**Purpose Statement:**

This workbook is completed by the applicant and submitted to the Texas Commission on Environmental Quality (TCEQ). This workbook is a tool available for all Minor New Source Review (NSR) projects using AERSCREEN, AERMOD, or ISC/ISCPrime for an impacts review and its use is required as of July 1, 2025. Provide the workbook with the permit application submittal for any Minor NSR project requiring a modeling impacts demonstration. Note: This workbook is only for AERSCREEN, AERMOD, or ISC/ISCPrime analyses. If SCREEN3 is relied on, the Electronic Modeling Evaluation Workbook (EMEW) for SCREEN3 should be used.

Projects for which pollutants trigger Prevention of Significant Deterioration (PSD) review should submit a protocol and not utilize this form. Note for projects that contain both PSD and Minor NSR reviews, the Minor NSR analyses should be documented in the EMEW and submitted with the PSD protocol. Alternatively, all Minor NSR analyses may be documented in the PSD protocol, in which case an EMEW is not required.

This workbook follows the guidance outlined in the Air Quality Modeling Guidelines (AQMG), APDG 6232 which can be found here:

[https://www.tceq.texas.gov/permitting/air/guidance/newsourcesreview/nsr\\_mod\\_guidance.html](https://www.tceq.texas.gov/permitting/air/guidance/newsourcesreview/nsr_mod_guidance.html)

Information on active TCEQ air dispersion modeling policy memos can be found here:

[https://www.tceq.texas.gov/permitting/air/memos/modeling\\_memos.html](https://www.tceq.texas.gov/permitting/air/memos/modeling_memos.html)

**General Workbook Information:**

Under Texas Government Code 559.003(a), individuals are entitled to receive and review any information collected by TCEQ about the individual by means of a form that is completed and filed with TCEQ in a paper or electronic format on the TCEQ website consistent with Texas Government Code sec., 559.003(b). The individual is also entitled to have TCEQ correct information about the individual that is incorrect.

If you have questions on how to fill out this form or about the Air Permits Division, contact us at 512-239-1250.

Accessibility Disclaimer: This workbook contains intentionally blank cells.

**Workbook Instructions:**

1. Save a copy of the workbook to your computer or desktop prior to entering data.
2. Complete all required sections leaving no blanks. Use the "tab" button or the arrow keys to move to the next available cell. Use "enter" to move down a line.
3. Fill in the workbook in order - from left to right, top to bottom, and tabs in the order they are represented. Do not skip around as this will cause errors. Use caution if changing a previously entered entry. **Note: When pasting, always use Excel's "Paste as Values" option from the right-click menu.**
4. Do not include formulas with links to other workbooks.
5. Not applicable sections of this workbook will be hidden as data is entered. For example, answering "No" to "Is downwash applicable?" will hide the sections of the workbook required only for downwash entry.
6. If the permit application is required to be submitted through State of Texas Environmental Electronic Reporting System (STEERS), the EMEW or modeling protocol (if PSD review is triggered) and any supplemental attachments (except modeling files) must be submitted as an application attachment in STEERS. All modeling files accompanying an EMEW should be submitted utilizing TCEQ Secure File Transfer Protocol (FTPS) (for initial submittal, share with [apirt@tceq.texas.gov](mailto:apirt@tceq.texas.gov)). Information accompanying an EMEW should be submitted at the same time as the application submittal. See Required Attachments and Additional Attachments (as applicable) sections below for more information on submitting supplemental information with the EMEW. Note: modeling files are highly recommended but not required for application submittal. Information on TCEQ FTPS can be found here:

<https://ftps.tceq.texas.gov/help/>

7. If printing the EMEW, follow the directions below to create a workbook header.
8. Printing the EMEW is not required for submitting to the Air Permits Division (APD); however, it might need to be printed for sending to the regional offices, local programs, and for public access if notice is required. To print the workbook, follow the instructions below. Be aware, several sheets contain large amounts of data and caution should be taken if printing, such as the Speciated Chemicals sheet and Speciated Emissions sheet.
9. Updates may be necessary throughout the review process. Updated workbooks must be submitted in electronic format to APD. For submittal to regional offices, local programs, or public places, applicant only has to print sheets that had updates. Change the headers accordingly, if applicable.

**Note:** Since this will be part of the permit application, follow the instructions in the Form PI-1 General Application on where to send copies of the EMEW and permit application. The Form PI-1 General Application can be found here:

<https://www.tceq.texas.gov/permitting/air/guidance/newsourcesreview/nsrapp-tools.html>

**Create Headers Before Printing:**

1. Right-click one of the workbook's sheet tabs and "Select All Sheets."
2. Enter the "Page Layout View" by using the navigation ribbon's View > Workbook Views > Page Layout, or by clicking the page layout icon in the lower-right corner of Excel.
3. Add the date, company name, and permit number (if known) to the upper-right header. Note that this may take up to a minute to update the spreadsheet. Select any tab to continue working on the spreadsheet.

**Printing Tips:**

1. The default printing setup for each sheet in the workbook is set for the TCEQ preferred format. The print areas are set up to not include the instructions on each sheet.
2. Applicant has access to change all printing settings to fit their needs and printed font size. Some common options include:
  - Change what area is being printed (whole active sheet or a selection);
  - Change the orientation (portrait or landscape);
  - Change the margin size; and
  - Change the scaling (all columns on one sheet, full size, custom selection, etc.).

**Final Modeling Submittal:**

Anytime final modeling files are being submitted, the applicant should notify the following: permit reviewer assigned and permit reviewer's supervisor.

The following options are available for an applicant to provide modeling (or any other files):

1. Applicant can transfer files through a File Transfer Protocol (FTP) site:
  - a. Applicant may have their own FTP site and can share the files with TCEQ staff.
  - b. Applicants can use the TCEQ FTPS site.
2. Applicant can email files smaller than 25mb.
3. Applicant can mail or hand deliver the files on an external storage device.

Instructions for setting up an account on the TCEQ FTPS site are located at:

<https://ftps.tceq.texas.gov/help/>

# Texas Commission on Environmental Quality

## Electronic Modeling Evaluation Workbook (EMEW)

### General

Date: 8-1-2025

Permit #: TBD

Company Name: Fermi Equipment Holdco LLC

| Required Attachments:                                                                                                                                                                                                                                                                                                                                                                                         |                              |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------|
| <b>Notes:</b><br>1. The following are attachments that must be included with any modeling analysis.<br>2. If providing the plot plan and area map with the permit application, ensure there is also a copy with the EMEW.<br>3. For larger properties or dense source areas, provide multiple zoomed-in plot plans that are legible.<br>4. All plot plans and area maps should not be marked as confidential. |                              |
| Required Attachments                                                                                                                                                                                                                                                                                                                                                                                          | Select "X" from the dropdown |
| <b>Is a Plot Plan attached?</b><br>Make sure all property/fence lines are visible and marked, all modeled sources and buildings are clearly labeled, and a north arrow and clearly marked scale are included.                                                                                                                                                                                                 | X                            |
| <b>Is an Area Map attached?</b><br>Include all property lines, annotate schools within 3,000 ft of the nearest property line, and identify all non-industrial receptors.                                                                                                                                                                                                                                      | X                            |

| Additional Attachments (as applicable):                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                           |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------|
| <b>Notes:</b><br>1. These are a few examples of attachments that may need to be included. There may be others depending on the scope of the modeling analysis.<br>2. Information provided in the EMEW does not need to be provided or duplicated in an additional or supplemental attachment. Additional and supplemental attachments are for information that cannot fit in an EMEW.<br>3. All essential supplemental and/or additional attachments should not be marked as confidential. |                                           |
| Site Specific Processed Met Data Information                                                                                                                                                                                                                                                                                                                                                                                                                                               | Select "X" from the dropdown if included: |
| Raw data files (ASOS, surface, and upper air).                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                           |

Permit #: TBD

Company Name: Fermi Equipment Holdco LLC

#### I. Project Information

|                                                                                                                                                    |                                                                                                                                                                                                                                                                                          |
|----------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>A. Project Overview:</b> Give a brief project overview. To type or insert text, double click in the cell (response limited to 2000 characters). | Project to install 15 6x1 combined cycle natural gas-fired combustion turbines as well as associated ancillary equipment. Includes 15 cooling towers, 90 lube oil vents, 2 fire pumps, 6 emergency generators, 2 black start generators, 4 diesel tanks and associated fugitive sources. |
|----------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

#### II. Air Dispersion Modeling Preliminary Information

**Instructions:** Fill in the information below based on the modeling setup. The selections chosen in this sheet will carry throughout the sheet and workbook. Based on selections below, only portions of the sheet and workbook will be available. Therefore, it is vital the sheet and workbook are filled out in order. Do not skip around.

For larger text boxes, double click to type or insert text.

##### A. Type of Model Used:

| Type                                     | Select "X" in all that apply |
|------------------------------------------|------------------------------|
| AERMOD                                   | X                            |
| AERSCREEN                                |                              |
| Enter in all applicable Model Version(s) | 2412                         |

##### B. Building Downwash:

| Requested Information                                                                                           | Response       |
|-----------------------------------------------------------------------------------------------------------------|----------------|
| Is building downwash applicable? Select "Yes" if a volume source will be located on or adjacent to a structure. | Choose an item |
| Enter BPIP version (AERMOD and ISCPrime only)                                                                   | 4274           |

##### C. Type of Analyses:

| Type                                                                            | Select "X" in all that apply |
|---------------------------------------------------------------------------------|------------------------------|
| Minor NSR National Ambient Air Quality Standards (NAAQS)                        |                              |
| Health Effects                                                                  | X                            |
| State Property Line                                                             | X                            |

### Model Options

Date: 8-1-2025

Permit #: TBD

Company Name: Fermi Equipment Holdco LLC

#### H. Receptor Grid:

For AERMOD or ISC/ISCPrime, fill in the following information on the modeled receptor grid. Note: Receptor grid resolution (tight, fine, medium, coarse) are based on recommended receptor grid spacing per the AQMG. If something outside of this is used, fully describe it below. Also, consider secondary contributions when determining significant receptors for PM<sub>2.5</sub>. See Note 2 on the Secondary Formation of PM<sub>2.5</sub> sheet for more information.

| Parameter                                                                                                                                                             | Value |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------|
| <b>Tight Receptor Spacing (m)</b><br>(Per Appendix M of the AQMG, 25 meter spacing is recommended for tight receptor spacing.)                                        | 25    |
| <b>Tight Receptor Distance (m)</b><br>(Per Appendix M of the AQMG, tight receptor spacing could extend up to 200-300 meters from the sources being evaluated.)        | 300   |
| <b>Fine Receptor Spacing (m)</b><br>(Per Appendix M of the AQMG, 100 meter spacing is recommended for fine receptor spacing.)                                         | 100   |
| <b>Fine Receptor Distance (m)</b><br>(Per Appendix M of the AQMG, fine receptors could extend one kilometer from the sources being evaluated.)                        | 1000  |
| <b>Medium Receptor Spacing (m)</b><br>(Per Appendix M of the AQMG, 500 meter spacing is recommended for medium receptor spacing, as applicable.)                      | 500   |
| <b>Medium Receptor Distance (m)</b><br>(Per Appendix M of the AQMG, medium receptors could extend from one to five kilometers from the sources being evaluated.)      | 5000  |
| <b>Coarse Receptor Spacing (m)</b><br>(Per Appendix M of the AQMG, 1 kilometer spacing is recommended for coarse receptor spacing, as applicable.)                    | 1000  |
| <b>Coarse Receptor Distance (m)</b><br>(Per Appendix M of the AQMG, coarse receptors could extend out to 50 km, as needed.)                                           | 50000 |
| Describe any other receptor grid designs or locations of interest (e.g., significant receptors, over water, GLCni, SPLD, etc.) (response limited to 1500 characters). |       |
|                                                                                                                                                                       |       |

#### I. Terrain:

| Requested Information                                                                                                 | Response |
|-----------------------------------------------------------------------------------------------------------------------|----------|
| Select the terrain option being modeled:                                                                              | Elevated |
| AERMAP Version                                                                                                        | 24142    |
| Provide additional justification for the selected terrain option, if applicable (response limited to 500 characters). |          |

**Air Permit Division Air Permit Support (APD-APS) Air Permitting Surcharge Payment  
Texas Commission on Environmental Quality**

To process a permit application as part of the expedited permit program, Air Permits Division (APD) requires a surcharge to cover expenses incurred to expedite the processing of an application using additional resources. The surcharge must be submitted along with the expedited request to Texas Commission on Environmental Quality (TCEQ).

**Instructions**

**I. Contact Information**

List the legal name of the company, corporation, partnership, or person who is requesting to expedite the processing of the application. List the Customer Reference Number (CN) and the Regulated Entity Number (RN). Provide the name, title, mailing address, telephone number, and e-mail address of the company official or technical contact. This person must have the authority to make binding agreements and representations on behalf of the applicant. Make sure all contact information matches the information provided on the application form associated with this request (e.g., PI-1).

**II. Project Information**

List the facility name, permit number, and project number, as applicable. This information should match Form Expedited Permit Request (APD-EXP).

**III. Surcharge Payment**

The fee amount for the various air permit projects are listed as follows:

| <b>Project Type</b>                               | <b>Fee Amount</b> |
|---------------------------------------------------|-------------------|
| Standard Permit (with public notice requirements) | \$3,000           |
| Title V General Operating Permit (GOP)            | \$3,000           |
| Title V Site Operating Permit (SOP)               | \$10,000          |
| NSR case-by-case permit                           | \$10,000          |
| Federal NSR permits                               | \$20,000          |

NSR case-by-case permit that accompanies a federal NSR permit does not have an additional surcharge.

Permits by rule (PBRs) and Standard Permit (which do not require public notice) must use the ePermits system and pay \$500 (**non-refundable**, flat surcharge). Surcharge will be collected through the ePermits system.

Mail the completed Form APD-APS Air Permitting Surcharge Payment and payment to:

TX Commission on Environmental Quality, Cashier's Office MC 214  
P.O. Box 13088, Austin, TX 78711-3088

**Explanation (Table 2F Supplement):**

- <sup>1</sup> Individual Table 2F's should be used to summarize the project emission increase for each criteria pollutant.
- <sup>2</sup> Emission Point Number as designated in NSR Permit or Emissions Inventory.
- <sup>3</sup> All records and calculations for these values must be available upon request.
- <sup>4</sup> Correct actual emissions for currently applicable rule or permit requirements, and periods of non-compliance. These corrections, as well as any MSS previously demonstrated under 30 TAC 101, should be explained in the Table 2F supplement.
- <sup>5</sup> If projected actual emission is used it must be noted in the next column and the basis for the projection identified in the Table 2F supplement.
- <sup>6</sup> Proposed Emissions (column B) minus Baseline Emissions (column A).
- <sup>7</sup> Correction made to emission increase for what portion could have been accommodated during the baseline period. The justification and basis for this estimate must be provided in the Table 2F supplement.
- <sup>8</sup> Obtained by subtracting the correction from the difference. Must be a positive number.
- <sup>9</sup> Sum all values for this page.

**Explanation (Table 2F Supplement):**

- <sup>1</sup> Individual Table 2F's should be used to summarize the project emission increase for each criteria pollutant.
- <sup>2</sup> Emission Point Number as designated in NSR Permit or Emissions Inventory.
- <sup>3</sup> All records and calculations for these values must be available upon request.
- <sup>4</sup> Correct actual emissions for currently applicable rule or permit requirements, and periods of non-compliance. These corrections, as well as any MSS previously demonstrated under 30 TAC 101, should be explained in the Table 2F supplement.
- <sup>5</sup> If projected actual emission is used it must be noted in the next column and the basis for the projection identified in the Table 2F supplement.
- <sup>6</sup> Proposed Emissions (column B) minus Baseline Emissions (column A).
- <sup>7</sup> Correction made to emission increase for what portion could have been accommodated during the baseline period. The justification and basis for this estimate must be provided in the Table 2F supplement.
- <sup>8</sup> Obtained by subtracting the correction from the difference. Must be a positive number.
- <sup>9</sup> Sum all values for this page.

**Explanation (Table 2F Supplement):**

- <sup>1</sup> Individual Table 2F's should be used to summarize the project emission increase for each criteria pollutant.
- <sup>2</sup> Emission Point Number as designated in NSR Permit or Emissions Inventory.
- <sup>3</sup> All records and calculations for these values must be available upon request.
- <sup>4</sup> Correct actual emissions for currently applicable rule or permit requirements, and periods of non-compliance. These corrections, as well as any MSS previously demonstrated under 30 TAC 101, should be explained in the Table 2F supplement.
- <sup>5</sup> If projected actual emission is used it must be noted in the next column and the basis for the projection identified in the Table 2F supplement.
- <sup>6</sup> Proposed Emissions (column B) minus Baseline Emissions (column A).
- <sup>7</sup> Correction made to emission increase for what portion could have been accommodated during the baseline period. The justification and basis for this estimate must be provided in the Table 2F supplement.
- <sup>8</sup> Obtained by subtracting the correction from the difference. Must be a positive number.
- <sup>9</sup> Sum all values for this page.

|-------------------------------------------|
| <b>Explanation (Table 2F Supplement):</b> |
|-------------------------------------------|

- <sup>1</sup> Individual Table 2F's should be used to summarize the project emission increase for each criteria pollutant.
- <sup>2</sup> Emission Point Number as designated in NSR Permit or Emissions Inventory.
- <sup>3</sup> All records and calculations for these values must be available upon request.
- <sup>4</sup> Correct actual emissions for currently applicable rule or permit requirements, and periods of non-compliance. These corrections, as well as any MSS previously demonstrated under 30 TAC 101, should be explained in the Table 2F supplement.
- <sup>5</sup> If projected actual emission is used it must be noted in the next column and the basis for the projection identified in the Table 2F supplement.
- <sup>6</sup> Proposed Emissions (column B) minus Baseline Emissions (column A).
- <sup>7</sup> Correction made to emission increase for what portion could have been accommodated during the baseline period. The justification and basis for this estimate must be provided in the Table 2F supplement.
- <sup>8</sup> Obtained by subtracting the correction from the difference. Must be a positive number.
- <sup>9</sup> Sum all values for this page.

**TABLE 2F  
PROJECT EMISSION INCREASE**

|                                |             |                |            |

**Explanation (Table 2F Supplement):**

<sup>1</sup> Individual Table 2F's should be used to summarize the project emission increase for each criteria pollutant.

<sup>2</sup> Emission Point Number as designated in NSR Permit or Emissions Inventory.

<sup>3</sup> All records and calculations for these values must be available upon request.

<sup>4</sup> Correct actual emissions for currently applicable rule or permit requirements, and periods of non-compliance. These corrections, as well as any MSS previously demonstrated under 30 TAC 101, should be explained in the Table 2F supplement.

<sup>5</sup> If projected actual emission is used it must be noted in the next column and the basis for the projection identified in the Table 2F supplement.

<sup>6</sup> Proposed Emissions (column B) minus Baseline Emissions (column A).

<sup>7</sup> Correction made to emission increase for what portion could have been accommodated during the baseline period. The justification and basis for this estimate must be provided in the Table 2F supplement.

<sup>8</sup> Obtained by subtracting the correction from the difference. Must be a positive number.

<sup>9</sup> Sum all values for this page.

**Explanation (Table 2F Supplement):**

- <sup>1</sup> Individual Table 2F's should be used to summarize the project emission increase for each criteria pollutant.
- <sup>2</sup> Emission Point Number as designated in NSR Permit or Emissions Inventory.
- <sup>3</sup> All records and calculations for these values must be available upon request.
- <sup>4</sup> Correct actual emissions for currently applicable rule or permit requirements, and periods of non-compliance. These corrections, as well as any MSS previously demonstrated under 30 TAC 101, should be explained in the Table 2F supplement.
- <sup>5</sup> If projected actual emission is used it must be noted in the next column and the basis for the projection identified in the Table 2F supplement.
- <sup>6</sup> Proposed Emissions (column B) minus Baseline Emissions (column A).
- <sup>7</sup> Correction made to emission increase for what portion could have been accommodated during the baseline period. The justification and basis for this estimate must be provided in the Table 2F supplement.
- <sup>8</sup> Obtained by subtracting the correction from the difference. Must be a positive number.
- <sup>9</sup> Sum all values for this page.

**Explanation (Table 2F Supplement):**

<sup>1</sup> Individual Table 2F's should be used to summarize the project emission increase for each criteria pollutant.

<sup>2</sup> Emission Point Number as designated in NSR Permit or Emissions Inventory.

<sup>3</sup> All records and calculations for these values must be available upon request.

<sup>4</sup> Correct actual emissions for currently applicable rule or permit requirements, and periods of non-compliance. These corrections, as well as any MSS previously demonstrated under 30 TAC 101, should be explained in the Table 2F supplement.

<sup>5</sup> If projected actual emission is used it must be noted in the next column and the basis for the projection identified in the Table 2F supplement.

<sup>6</sup> Proposed Emissions (column B) minus Baseline Emissions (column A).

<sup>7</sup> Correction made to emission increase for what portion could have been accommodated during the baseline period. The justification and basis for this estimate must be provided in the Table 2F supplement.

<sup>8</sup> Obtained by subtracting the correction from the difference. Must be a positive number.

<sup>9</sup> Sum all values for this page.

**Explanation (Table 2F Supplement):**

Individual Table 2F's should be used to summarize the project emission increase for each criteria pollutant.

<sup>2</sup> Emission Point Number as designated in NSR Permit or Emissions Inventory.

<sup>3</sup> All records and calculations for these values must be available upon request.

<sup>4</sup> Correct actual emissions for currently applicable rule or permit requirements, and periods of non-compliance. These corrections, as well as any MSS previously demonstrated under 30 TAC 101, should be explained in the Table 2F supplement.

<sup>5</sup> If projected actual emission is used it must be noted in the next column and the basis for the projection identified in the Table 2F supplement.

<sup>6</sup> Proposed Emissions (column B) minus Baseline Emissions (column A).

<sup>7</sup> Correction made to emission increase for what portion could have been accommodated during the baseline period. The justification and basis for this estimate must be provided in the Table 2F supplement.

<sup>8</sup> Obtained by subtracting the correction from the difference. Must be a positive number.

<sup>9</sup> Sum all values for this page.

|-------------------------------------------|
| <b>Explanation (Table 2F Supplement):</b> |
|-------------------------------------------|

<sup>1</sup> Individual Table 2F's should be used to summarize the project emission increase for each criteria pollutant.

<sup>2</sup> Emission Point Number as designated in NSR Permit or Emissions Inventory.

<sup>3</sup> All records and calculations for these values must be available upon request.

<sup>4</sup> Correct actual emissions for currently applicable rule or permit requirements, and periods of non-compliance. These corrections, as well as any MSS previously demonstrated under 30 TAC 101, should be explained in the Table 2F supplement.

<sup>5</sup> If projected actual emission is used it must be noted in the next column and the basis for the projection identified in the Table 2F supplement.

<sup>6</sup> Proposed Emissions (column B) minus Baseline Emissions (column A).

<sup>7</sup> Correction made to emission increase for what portion could have been accommodated during the baseline period. The justification and basis for this estimate must be provided in the Table 2F supplement.

<sup>8</sup> Obtained by subtracting the correction from the difference. Must be a positive number.

<sup>9</sup> Sum all values for this page.

**Explanation (Table 2F Supplement):**

- <sup>1</sup> Individual Table 2F's should be used to summarize the project emission increase for each criteria pollutant.
- <sup>2</sup> Emission Point Number as designated in NSR Permit or Emissions Inventory.
- <sup>3</sup> All records and calculations for these values must be available upon request.
- <sup>4</sup> Correct actual emissions for currently applicable rule or permit requirements, and periods of non-compliance. These corrections, as well as any MSS previously demonstrated under 30 TAC 101, should be explained in the Table 2F supplement.
- <sup>5</sup> If projected actual emission is used it must be noted in the next column and the basis for the projection identified in the Table 2F supplement.
- <sup>6</sup> Proposed Emissions (column B) minus Baseline Emissions (column A).
- <sup>7</sup> Correction made to emission increase for what portion could have been accommodated during the baseline period. The justification and basis for this estimate must be provided in the Table 2F supplement.
- <sup>8</sup> Obtained by subtracting the correction from the difference. Must be a positive number.
- <sup>9</sup> Sum all values for this page.

# COMISIÓN DE CALIDAD AMBIENTAL DE TEXAS

## Ejemplo A

### AVISO DE RECIBIMIENTO DE LA SOLICITUD E INTENCIÓN DE OBTENER UN PERMISO DE AIRE (NORI)

NÚMERO DE PERMISO DE CALIDAD DEL AIRE PROPUESTO  
181009, PSDTX1670, Y GHGPSDTX254

**SOLICITUD** Fermi Equipment Holdco, LLC, ha solicitado a la Comisión de Calidad Ambiental de Texas (TCEQ, por sus siglas en inglés) para: Emisión del permiso 181009, Emisión del permiso de prevención del deterioro significativo (PSD, por sus siglas en inglés) PSDTX1670 y Emisión de Permiso de Prevención de Deterioro Significativo (PSD) de Gases de Efecto Invernadero (GEI) GHGPSDTX254.

Esta solicitud autorizaría la construcción de Planta generadora eléctrica situado aproximadamente a 15 millas al noreste de Amarillo, a lo largo de la carretera estadounidense 60, cerca de la intersección de la carretera estadounidense 60 y Farm-to-Market Road 2373 en el lado norte de la carretera, Amarillo, condado de Carson, Texas 79101. Esta solicitud se está procesando de manera acelerada, según lo permiten las reglas de la comisión en el Título 30 del Código Administrativo de Texas, Capítulo 101, Subcapítulo J.

Este enlace a un mapa electrónico de la ubicación general del sitio o de la instalación se ofrece como cortesía pública y no forma parte de la solicitud o del anuncio. Para conocer la ubicación exacta, consulte la solicitud.

<https://gisweb.tceq.texas.gov/LocationMapper/?marker=-101.5776,35.2843&level=13>.

La instalación emitirá los siguientes contaminantes: Monóxido de carbono, contaminantes atmosféricos peligrosos, niebla de ácido sulfúrico, óxidos de nitrógeno, compuestos orgánicos, material particulado, incluyendo material particulado con diámetros de 10 micras o menos y 2,5 micras o menos, amoníaco y dióxido de azufre. La instalación propuesta también emitirá gases de efecto invernadero.

Esta solicitud se presentó a la TCEQ el 1 de agosto de 2025. La solicitud estará disponible para su visualización y copia en la oficina central de la TCEQ, la Amarillo oficina regional, y la Biblioteca Pública del Condado de Carson, 401 Main Street, Panhandle, Condado de Carson, Texas a partir del primer día de la publicación de este aviso. El expediente de cumplimiento de la instalación, si existe, está a disposición del público en la Amarillo oficina regional de la TCEQ. La solicitud (cualquier actualización inclusive) está disponible electrónicamente en la siguiente página web:

<https://www.tceq.texas.gov/permitting/air/airpermit-applications-notices>.

El director ejecutivo ha determinado que la solicitud está administrativamente completa y realizará una revisión técnica de la misma.

**COMENTARIOS DEL PÚBLICO. Puede presentar comentarios públicos a la Oficina del Secretario Ejecutivo en la dirección que aparece más abajo.** La TCEQ considerará todos los comentarios públicos al desarrollar una decisión final sobre la solicitud y el director ejecutivo preparará una respuesta a esos comentarios.

**REUNIÓN PÚBLICA. Puede solicitar una reunión pública a la Oficina del Secretario Oficial en la dirección indicada más abajo.** El propósito de una reunión pública es ofrecer la oportunidad de presentar comentarios o hacer preguntas sobre la solicitud. Se convocará una reunión pública sobre la solicitud si lo solicita una persona interesada y el director ejecutivo determina que existe un grado significativo de interés público en la solicitud o si lo solicita un legislador local. Una reunión pública no es una audiencia de caso impugnado.

Una vez finalizada la revisión técnica de la solicitud, el director ejecutivo puede preparar un proyecto de permiso y emitirá una decisión preliminar sobre la solicitud. Si se prepara un proyecto de permiso de calidad del aire, se requiere un aviso de solicitud y decisión preliminar que se publicará y enviará por correo a quienes hayan hecho comentarios, hayan presentado solicitudes de audiencia o estén en la lista de correo de esta solicitud y contendrá el plazo final para presentar comentarios públicos.

**OPORTUNIDAD DE AUDIENCIA DE CASO IMPUGNADO** Usted puede solicitar una audiencia de caso impugnado con respecto a las partes de la solicitud de Permiso de Aire Número 181009 y Permiso de Calidad de Aire PSD Número PSDTX1670 si usted es una persona que puede ser afectada por las emisiones de contaminantes del aire

de la instalación. No existe la oportunidad de solicitar una audiencia de caso impugnado con respecto a la parte de la solicitud del Permiso de Calidad del Aire de GHGPSD Número GHGPSDTX254. Si solicita una audiencia de caso impugnado, debe presentar lo siguiente (1) su nombre (o en el caso de un grupo o asociación, un representante oficial), dirección postal y número de teléfono durante el día; (2) el nombre del solicitante y el número de permiso; (3) la declaración "[Yo/nosotros] solicito/solicitamos una audiencia de caso impugnado"; (4) una descripción específica de cómo usted se vería afectado negativamente por la solicitud y las emisiones de aire de la instalación de una manera no común al público en general; (5) la ubicación y la distancia de su propiedad en relación con la instalación; (6) una descripción del uso que usted hace de la propiedad que puede verse afectada por la instalación; y (7) una lista de todas las cuestiones de hecho controvertidas que presente durante el periodo de comentarios. Si la solicitud la realiza un grupo o una asociación, deberá identificarse con nombre y dirección física a uno o varios miembros que estén legitimados para solicitar una audiencia. También deben identificarse los intereses que el grupo o la asociación pretende proteger. También puede presentar sus propuestas de ajustes a la solicitud/permiso que satisfagan sus preocupaciones.

Actualmente se puede solicitar una audiencia de caso impugnado hasta 30 días después del envío de la respuesta a los comentarios de esta solicitud. Tenga en cuenta que, si el solicitante realiza cambios en sus declaraciones antes de que la solicitud se considere técnicamente completa y ello da lugar a niveles de emisión inferiores a los umbrales de la PSD, el plazo para presentar una solicitud de audiencia de caso impugnado será de 30 días después de la última publicación del NORI. En tales casos, este NORI puede ser su única oportunidad para solicitar una audiencia de caso impugnado. Si se presenta una solicitud a tiempo, el plazo para solicitar una audiencia de caso impugnado se ampliará a 30 días después del envío de la respuesta a los comentarios.

Si se presenta una solicitud de audiencia a tiempo, una vez cerrados todos los periodos de comentarios y solicitudes aplicables, el Director Ejecutivo enviará la parte aplicable de la solicitud y cualquier solicitud de audiencia de caso impugnado a los Comisionados para su consideración en una reunión programada de la Comisión. La Comisión sólo podrá conceder una solicitud de audiencia de caso impugnado sobre cuestiones que el solicitante haya presentado en sus comentarios oportunos y que no hayan sido retirados posteriormente. **Si se concede una audiencia, el objeto de la misma se limitará a las cuestiones de hecho controvertidas o a las cuestiones mixtas de hecho y de derecho relativas a los problemas de calidad del aire pertinentes y materiales presentados durante el periodo de comentarios.** Cuestiones como el valor de la propiedad, el ruido, la seguridad del tráfico y la zonificación quedan fuera de la jurisdicción de la Comisión para ser tratadas en este procedimiento.

**LISTA DE CORREO.** Además de presentar comentarios públicos, puede solicitar que se le incluya en una lista de correo para recibir futuros avisos públicos sobre esta solicitud específica enviando una solicitud por escrito a la Oficina del Secretario Oficial en la dirección que figura a continuación.

**CONTACTOS E INFORMACIÓN DE LA AGENCIA.** Los comentarios y solicitudes del público deben presentarse vía electrónicamente en [www14.tceq.texas.gov/epic/eComment/](http://www14.tceq.texas.gov/epic/eComment/), o por escrito a Texas Commission on Environmental Quality, Office of the Chief Clerk, MC-105, P.O. Box 13087, Austin, Texas 78711-3087. Tenga en cuenta que cualquier información de contacto que proporcione, incluyendo su nombre, número de teléfono, dirección de correo electrónico y dirección física, formará parte del registro público de la agencia. Para más información sobre el proceso de tramitación de permisos, favor de llamar al Programa de Educación pública de la TCEQ sin costo al 1-800-687-4040, o bien visitar su sitio web, [www.tceq.texas.gov/goto/pep](http://www.tceq.texas.gov/goto/pep). Para información en español, favor de llamar al 1-800-687-4040. También es posible consultar oportunidades de participación pública en nuestro sitio web, [www.tceq.texas.gov/goto/participation](http://www.tceq.texas.gov/goto/participation).

También se puede obtener más información de TRC Environmental Corporation, 11767 Katy Fwy, Suite 850 o llamando a Ms. Elizabeth Stanko, Director de Proyectos de Transición Energética al (713) 244-1039.

Fecha de emisión del aviso: 5 de agosto de 2025

## EXAMPLE F

### SIGN POSTING

Sign(s) must be in place on day of publication of first newspaper notice and must remain in place and be legible during that designated comment period (30 days). These signs must remain in place until 30 days after the last newspaper publication of the second notice (either English or alternate language notice, whichever is later). Note - The information shown is an example only. It is your responsibility to verify that the appropriate information pertaining to your application is accurate. Each sign placed at the site must be located within 10 feet of each (every) property line paralleling a public highway, street or road. Signs must be visible from the street and spaced at not more than 1,500-foot intervals. A minimum of one sign, but not more than three signs shall be required along any property line paralleling a public highway, street, or road.

Sign(s) must be placed at whatever height above the ground is necessary for sign(s) to be 100% visible from the street.

## **WHITE BACKGROUND WITH BLACK LETTERS**

**All lettering must be no less than 1-1/2 inch block printed capitals.**

# TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

## EXAMPLE A

### NOTICE OF RECEIPT OF APPLICATION AND INTENT TO OBTAIN AIR PERMIT (NORI)

PROPOSED AIR QUALITY PERMIT NUMBER 181009, PSDTX1670,  
AND GHGPSDTX254

**APPLICATION** Fermi Equipment Holdco, LLC, has applied to the Texas Commission on Environmental Quality (TCEQ) for:

Issuance of Permit 181009

Issuance of Prevention of Significant Deterioration (PSD) Permit PSDTX1670

Issuance of Greenhouse Gas (GHG) Prevention of Significant Deterioration (PSD) Permit GHGPSDTX254

This application would authorize construction of the Electric Generating Plant located approximately 15 miles northeast of Amarillo, along US Highway 60, near intersection of US Highway 60 and Farm-to-Market Road 2373 on north side of the road., Amarillo, Carson County, Texas 79101 This application is being processed in an expedited manner, as allowed by the commission's rules in 30 Texas Administrative Code, Chapter 101, Subchapter J. **AVISO DE IDIOMA**

**ALTERNATIVO.** El aviso de idioma alternativo en español está disponible en

<https://www.tceq.texas.gov/permitting/air/newsourcesreview/airpermits-pendingpermit-apps>. This link to an electronic map of the site or facility's general location is provided as a public courtesy and not part of the application or notice. For exact location, refer to application. <https://gisweb.tceq.texas.gov/LocationMapper/?marker=-101.5776,35.2843&level=13>. The facility will emit the following contaminants: carbon monoxide, hazardous air pollutants, sulfuric acid mist, nitrogen oxides, ammonia, organic compounds, particulate matter including particulate matter with diameters of 10 microns or less and 2.5 microns or less and sulfur dioxide. The proposed facility will also emit greenhouse gases.

This application was submitted to the TCEQ on August 1, 2025. The application will be available for viewing and copying at the TCEQ central office, the TCEQ Amarillo regional office, and the Carson County Public Library, 401 Main Street, Panhandle, Carson County, Texas beginning the first day of publication of this notice. The facility's compliance file, if any exists, is available for public review in the Amarillo regional office of the TCEQ. The application, including any updates, is available electronically at the following webpage: <https://www.tceq.texas.gov/permitting/air/airpermit-applications-notices>

The executive director has determined the application is administratively complete and will conduct a technical review of the application.

**PUBLIC COMMENT.** You may submit public comments to the Office of the Chief Clerk at the address below. The TCEQ will consider all public comments in developing a final decision on the application and the executive director will prepare a response to those comments.

**PUBLIC MEETING.** You may request a public meeting to the Office of the Chief Clerk at the address below. The purpose of a public meeting is to provide the opportunity to submit comments or ask questions about the application. A public meeting about the application will be held if the executive director determines that there is a significant degree of public interest in the application, if requested by an interested person, or if requested by a local legislator. A public meeting is not a contested case hearing.

After technical review of the application is complete, the executive director may prepare a draft permit and will issue a preliminary decision on the application. If a draft Air Quality Permit is prepared, a Notice of Application and Preliminary Decision is required and it will then be published and mailed to those who made comments, submitted hearing requests or are on the mailing list for this application and will contain the final deadline for submitting public comments.

**OPPORTUNITY FOR A CONTESTED CASE HEARING** You may request a contested case hearing regarding the portions of the application for Air Permit Number 181009 and PSD Air Quality Permit Number PSDTX1670 if you are a person who may be affected by emissions of air contaminants from the facility. There is no opportunity to

request a contested case hearing regarding the portion of the application for GHGPSD Air Quality Permit Number GHGPSDTX254. If requesting a contested case hearing, you must submit the following: (1) your name (or for a group or association, an official representative), mailing address, and daytime phone number; (2) applicant's name and permit number; (3) the statement "[I/we] request a contested case hearing"; (4) a specific description of how you would be adversely affected by the application and air emissions from the facility in a way not common to the general public; (5) the location and distance of your property relative to the facility; (6) a description of how you use the property which may be impacted by the facility; and (7) a list of all disputed issues of fact that you submit during the comment period. If the request is made by a group or an association, one or more members who have standing to request a hearing must be identified by name and physical address. The interests the group or association seeks to protect must also be identified. You may also submit your proposed adjustments to the application/permit which would satisfy your concerns.

A contested case hearing may currently be requested until 30 days after the mailing of the response to comments for this application. Note, if the applicant makes changes to its representations prior to the application being deemed technically complete that result in emission levels that are less than PSD thresholds, then the deadline to submit a request for a contested case hearing will be 30 days after the last publication of the NORI. In such cases, this NORI may be your only opportunity to request a contested case hearing. If a request is timely filed, the deadline for requesting a contested case hearing will be extended to 30 days after the mailing of the response to comments.

If a hearing request is timely filed, following the close of all applicable comment and request periods, the Executive Director will forward the applicable portion of the application and any requests for contested case hearing to the Commissioners for their consideration at a scheduled Commission meeting. The Commission may only grant a request for a contested case hearing on issues the requestor submitted in their timely comments that were not subsequently withdrawn. **If a hearing is granted, the subject of a hearing will be limited to disputed issues of fact or mixed questions of fact and law relating to relevant and material air quality concerns submitted during the comment period.** Issues such as property values, noise, traffic safety, and zoning are outside of the Commission's jurisdiction to address in this proceeding.

**MAILING LIST.** In addition to submitting public comments, you may ask to be placed on a mailing list to receive future public notices for this specific application by sending a written request to the Office of the Chief Clerk at the address below.

**AGENCY CONTACTS AND INFORMATION.** All public comments and requests must be submitted either electronically at [www14.tceq.texas.gov/epic/eComment/](http://www14.tceq.texas.gov/epic/eComment/), or in writing to the Texas Commission on Environmental Quality, Office of the Chief Clerk, MC-105, P.O. Box 13087, Austin, Texas 78711-3087. Please be aware that any contact information you provide, including your name, phone number, email address and physical address will become part of the agency's public record. For more information about the permitting process, please call the TCEQ Public Education Program, Toll Free, at 1-800-687-4040 or visit their website at [www.tceq.texas.gov/goto/pep](http://www.tceq.texas.gov/goto/pep). Si desea información en Español, puede llamar al 1-800-687-4040. You can also view our website for public participation opportunities at [www.tceq.texas.gov/goto/participation](http://www.tceq.texas.gov/goto/participation).

Further information may also be obtained from Fermi Equipment Holdco, LLC, 600 South Tyler Street Suite 1501, Amarillo, Texas 79101-2351 or by calling Ms. Elizabeth Stanko, TRC Environmental Corporation, Director, Energy Transition Projects at (713) 244-1039.

Notice Issuance Date: August 5, 2025

**Plain Language Summary for New Source Review (NSR) Initial  
Application for Air New Source Review Permit Number 181009**

*The following summary is provided for this pending air permit application being reviewed by the Texas Commission on Environmental Quality as required by 30 Texas Administrative Code Chapter 39. The information provided in this summary may change during the technical review of the application and are not federal enforceable representations of the permit application.*

Fermi Equipment Holdco, LLC (CN606413086) has submitted an air permit application for initial new source review (NSR) Permit number (181009), PSD Permit number (PSDTX1670), and GHG Permit number (GHGPSDTX254) to authorize construction of a new natural gas-fired combined cycle power plant. The Fermi America Project Matador (RN112258678) will be installed at a greenfield site in Carson County. The site is located approximately 15 miles northeast of Amarillo, Texas along US Highway 60, near the intersection of US Hwy 60 and FM2373. The Fermi America Project Matador will provide electricity to an onsite data center campus.

Fermi Equipment Holdco LLC has listed in the application the pollutants and amounts that will be emitted for each facility. Below is the total amount for each pollutant that is proposed to be emitted each year for all the facilities.

| <b>Pollutant</b>                                                    | <b>Proposed Emissions (tons per year)</b> |
|---------------------------------------------------------------------|-------------------------------------------|
| Volatile Organic Compounds (VOC)                                    | 581.75                                    |
| Carbon Monoxide (CO)                                                | 2,140.86                                  |
| Nitrogen Oxides (NO <sub>x</sub> )                                  | 1,591.48                                  |
| Sulfur Dioxide (SO <sub>2</sub> )                                   | 282.28                                    |
| Ammonia (NH <sub>3</sub> )                                          | 1,370.78                                  |
| Total Particulate Matter (PM)                                       | 1,075.12                                  |
| Particulate Matter sized less than 10 Microns (PM <sub>10</sub> )   | 1,025.80                                  |
| Particulate Matter sized less than 2.5 Microns (PM <sub>2.5</sub> ) | 976.69                                    |
| Sulfuric Acid (H <sub>2</sub> SO <sub>4</sub> )                     | 43.20                                     |
| Greenhouse Gas (CO <sub>2</sub> e)                                  | 23,584,211.38                             |
| Hazardous Air Pollutants (HAPs - Individual)                        | 44.04                                     |
| Hazardous Air Pollutants (HAPS - Aggregate)                         | 107.48                                    |

The combustion turbines will be equipped with selective catalytic reduction (SCR) to reduce NO<sub>x</sub> emissions and oxidation catalysts for CO and VOC emissions control. Greenhouse Gas (CO<sub>2</sub>e) emissions will be reduced using low-carbon natural gas fuel and energy-efficient turbine design. Good combustion, operating, and maintenance practices will be implemented for the combustion turbines. More detailed emission control information is provided in the air permit application.

## Resumen en Lenguaje Sencillo del Permiso Inicial de Revisión de Nuevas Fuentes Solicitud de Permiso de Revisión de Nuevas Fuentes de Aire Número 181009

*El siguiente resumen se proporciona para esta solicitud de permiso de aire pendiente que está siendo revisada por la Comisión de Calidad Ambiental de Texas, según lo dispuesto en el capítulo 39 del Código Administrativo de Texas. La información proporcionada en este resumen puede cambiar durante la revisión técnica de la solicitud y no son representaciones federales ejecutables de la solicitud de permiso.*

Fermi Equipment Holdco, LLC (CN606413086) ha presentado una solicitud de permiso de aire para la revisión inicial de nueva fuente (NSR) número de permiso (181009), número de permiso PSD (PSDTX1670) y número de permiso GHG (GHGPSDTX254) para autorizar la construcción de una nueva planta de energía de ciclo combinado a gas natural. El proyecto Matador de Fermi America (RN112258678) se instalará en un terreno no urbanizado en el condado de Carson. El sitio está ubicado aproximadamente a 15 millas al noreste de Amarillo, Texas, a lo largo de la carretera US 60, cerca de la intersección de la carretera US 60 y FM2373. El Proyecto Matador de Fermi America proporcionará electricidad a un campus de centro de datos en el sitio.

Fermi Equipment Holdco, LLC ha enumerado en la solicitud los contaminantes y las cantidades que se emitirán en cada instalación. A continuación, se muestra la cantidad total de cada contaminante que se propone emitir anualmente en todas las instalaciones.

| Los Contaminantes                                                 | Emisiones Propuestas<br>(toneladas por año) |
|-------------------------------------------------------------------|---------------------------------------------|
| Compuestos orgánicos volátiles (COV)                              | 581.75                                      |
| Monóxido de carbono (CO)                                          | 2,140.86                                    |
| Óxidos de nitrógeno (NOx)                                         | 1,591.48                                    |
| Dióxido de azufre (SO <sub>2</sub> )                              | 282.28                                      |
| Amoníaco (NH <sub>3</sub> )                                       | 1,370.78                                    |
| Partículas Totales (PM)                                           | 1,075.12                                    |
| Partículas de tamaño inferior a 10 micrones (PM <sub>10</sub> )   | 1,025.80                                    |
| Partículas de tamaño inferior a 2,5 micrones (PM <sub>2.5</sub> ) | 976.69                                      |
| Ácido sulfúrico (H <sub>2</sub> SO <sub>4</sub> )                 | 43.20                                       |
| Gases de efecto invernadero (CO <sub>2</sub> e)                   | 23,584,211.38                               |
| Contaminantes atmosféricos peligrosos (HAPs - Individual)         | 44.04                                       |
| Contaminantes atmosféricos peligrosos (HAPS - Aggregate)          | 107.48                                      |

Las turbinas de combustión estarán equipadas con reducción catalítica selectiva (SCR) para reducir las emisiones de NOx y catalizadores de oxidación para el control de las emisiones de CO y COV. Las emisiones de gases de efecto invernadero (CO<sub>2</sub>e) se reducirán utilizando gas natural bajo en carbono y un diseño de turbinas energéticamente eficiente. Se implementarán buenas prácticas de combustión, operación y mantenimiento para las turbinas de combustión. Se proporciona información más detallada sobre el control de emisiones en la solicitud de permiso de emisiones atmosféricas.
