RE: Commencement of construction deadline extension; Permits 1120-00003-V1 and PSD-LA-815;
TopChem Pollock, LLC, Pollock, Grant Parish, Louisiana

Dear Mr. Petreikis:

By letter dated November 20, 2019, TopChem Pollock, LLC (TopChem) requested a second extension to the deadline to commence construction of the Ammonia Production Plant.

The Ammonia Production Plant was first permitted (PSD-LA-815 and 1120-00003-V1) on December 20, 2016. Approval to construct shall become invalid if construction is not commenced within 18 months after receipt of a PSD permit per LAC 33:III.509.R.2, or within 24 months after receipt of a Title V permit per Louisiana General Condition IV of LAC 33:III.537.A; however, LDEQ may extend the 18/24-month periods upon a satisfactory showing that an extension is justified.

An extension to commence construction of the Ammonia Production Plant was approved on June 11, 2018. TopChem has requested another 18 month extension of the deadline to commence construction of the proposed Ammonia production Plant. Additional time is needed to secure financing for the project.

A notice requesting public comment on the proposed second extension was published on the department's website on January 23, 2020. Copies of the notice were mailed or e-mailed to individuals who have requested to be placed on the mailing list maintained by the Office of Environmental Services (OES) on January 21, 2020. The notice was also submitted to the US EPA Region 6. No comments were received.

Based on the above information, the Louisiana Department of Environmental Quality, Office of Environmental Services (LDEQ-OES), hereby extends the commencement of construction deadlines of Permits 1120-00003-V1 and PSD-LA-815 to June 20, 2021. If you have any questions, please contact Mei Wu of Air Permits Division at (225) 219-3428.

Sincerely,

A handwritten signature in black ink, appearing to read "Elliott B. Vega".
